This is a terrific letter Jack, thanks. I will circulate it. I know he gov’s team is already alarmed about crude on rail lines, but don’t know how he will respond on this one. His plane back is delayed and he might not get to his office til monday. I know how to get the message there

Subject: Greetings and a request

Hi Tom,

First, I saw a report of you speaking at a climate rally in LA. This says to me that you’re back in action - which is quite wonderful.

Second, Happy Holidays. It would be nice if they were peaceful, but that’s likely too much even to wish for.

And finally, the request. I’ve been involved with the campaign to prevent trains carrying coal from Utah to come to Oakland and be shipped overseas through Oakland. This issue has to do both with climate change and health issues in West Oakland where there is a very high incidence of asthma from all kinds of port related junk in the air.
The coal companies are exerting major pressure on the City Council.

It would be of great help if Governor Brown, just back from his positive contributions on climate change in Paris, would put in a word on this issue. I know that you’ve had personal contact with Jerry over the years. Perhaps you can help.

I’m attaching letter to the Governor from a group of people who are concerned with this issue. I’d most appreciate you taking a look at the letter and seeing what you can do.

All the best,
Jack Kurzweil
